Research Need for Construction Technical Advisory Group

Effective/Updated: August 14, 2015

ISSUE: Treatment of Contaminated Soil

SUMMARY OF PROBLEM: Extensive costs are incurred by IDOT to haul contaminated soil off site for disposal. IDOT is interested in any type of treatment option for the soil that would make the soil uncontaminated—and therefore reduce disposal costs.

EXPECTED IMPLEMENTABLE OUTCOME: To reduce the disposal costs for contaminated soil.

To submit a research idea for consideration at the spring 2016 Executive Committee meeting, prepare and submit a Proposed Research Idea form to IDOT (DOT.BMPR.RESEARCH@illinois.gov) no later than October 1, 2015.
