

Student Chapter Committees

Our bridge to the student body:

Get the word out about AREMA, organize social events, and get students connected!

Our bridge to the railroad industry:

Make connections with alumni and industry professionals to provide educational and networking opportunities for our chapter.

Where the wheels meet the rail:

Organize exciting trips each semester to visit railroad facilities, project locations, and conferences.

If you've got the money, I've got the time:

Come up with creative ways to raise funding for the activities and initiatives of our student chapter.

Pulling it all together:

Organize our involvement in the big events each semester including Engineering Open House (Spring), the Railroad Environmental Conference (Fall), and the AREMA Annual Conference (Fall).
